Rebar Couplers

Quality Assurance

Technical Bolts' established a comprehensive, state of the art in house lab, designed to accommodate the most rigorous of tests to make sure that our products are compliant to the highest international standards.

In house testing:

- Chemical composition test
- Tensile strength test
- Hardness test
- Charpy test
- Torsion test
- Salt spray corrosion test
- Metrology test
- Testing Coating thickness

Stock Management System

We utilized a “Manufacture to Stock” system, that will allow us to deliver all your products **Just In Time***.

Just In Time delivery is based on a pre-agreed range of products and quantities that will be manufactured and stocked ahead of time.

Advantages:

- Ease of tracking and audit of all your products in our state of the art facility
- Just In Time delivery with lead time as short as 1 day*
- Call-off your products when you need them, where you need them
- Save cost, time and storage space

Integrating our manufacturing Quality Assurance with the state of the art Stock Management systems will offer a comprehensive quality management system guaranteeing the highest quality products and services.

* These services are based on long term agreements with special terms and conditions. For more information please contact our sales team.
